Evanston Hospital | Glenbrook Hospital | Highland Park Hospital

### A Contemporary Vision for Clinical Care

Patients at Evanston Northwestern Healthcare (ENH) have access to a new generation of powerful imaging tools designed to diagnose and treat a host of medical disorders accurately and effectively. ENH offers convenient locations throughout Cook and Lake Counties with comprehensive radiology services including mammography, ultrasound, CT and MRI. The Department of Radiology is dedicated to providing superior patient service, support and care.

### The Department of Radiology provides the highest level of patient care with:

■ Highly specialized physicians – The largest group of specialized radiologists practicing on the North Shore. ENH radiologists have in-depth knowledge to interpret difficult or unusual cases and ensure a high degree of decision-making accuracy. For example, our staff includes radiologists who specialize in mammography, neuroradiology and pediatric radiology.

## Appointment Scheduling

For procedures other than ultrasound  
Call (888) ENH-6400 to schedule an  
appointment at any of our locations.

For ultrasound appointments,  
call the sites directly:

Evanston Hospital	(847) 570-2483
Glenbrook Hospital	(847) 657-5862
Highland Park Hospital	(847) 480-3890
ENH Vernon Hills	(847) 941-7818
ENH Old Orchard	(847) 663-8069

- State-of-the-art medical technology – ENH offers the latest technology for scanning and imaging the human body, including:
  - *64-Slice CT Scanner* – This technology, with its extraordinarily clear 3D images, allows radiologists to zoom in, manipulate and analyze scans, providing extremely detailed diagnostic information.
  - *Picture Archival Communication System (PACS)* – PACS provides secure access to digital medical images throughout the ENH system, so physicians can immediately access patient scans from any computer location.
- Minimally-invasive diagnosis and treatment – Our techniques result in fewer medical complications and side effects, improved patient comfort and faster recovery time.

■ Expert diagnosis and treatment of common and uncommon clinical conditions – Our physicians can identify, diagnose and treat conditions with a multitude of procedures:

#### – *Diagnostic Procedures*

- Back pain – Spinal MRI
- Muscle/joint pain – MRI or CT
- Stroke – Brain MRI
- Severe headache – Head CT
- Hearing loss – Temporal bone CT
- Breast lump/pain – Mammogram and ultrasound
- Solid breast mass – Ultrasound-guided, minimally invasive needle biopsy
- Painful breast cyst – Ultrasound-guided needle aspiration
- Uterine fibroids – MRI or ultrasound
- Blocked blood vessels/artries – MRI or CT angiography
- Pelvic pain (female) – Pelvic MRI or ultrasound
- Unexplained weight loss – Abdomen and pelvic CT
- Pediatric muscle/joint pain – General X-ray, or localized MRI or CT
- Pediatric urinary tract infection – Renal ultrasound and voiding cystourethrogram (VCUG)
- Hip abnormalities in the neonate – Screening ultrasound and diagnostic imaging

#### – *Treatment Procedures*

- Varicose veins – Laser venous ablation
- Uterine fibroids – Uterine fibroid embolization
- Blocked blood vessels/artries – Angioplasty and stenting treatment

■ State-of-the-art health screening procedures – Our physicians perform a host of screening and early detection tests, including:

- *MRI breast exam* – For patients with a genetic predisposition to breast disease or strong family history of breast cancer
- *High-definition 3D cardiac imaging and 3D CT angiography* – To detect coronary heart disease
